

Synthetic Curriculum Fixture

Grouping counters

Place twelve counters into three equal groups.

Each group contains four counters: $12 / 3 = 4$.

Worked example: $3 + 3 + 3 + 3 = 12$.

Activity: rearrange the counters and compare groups.

Observation: changing the arrangement preserves the total.

Table: Groups Counters per group Total

3	4	12
---	---	----

Measure and compare

Use the same unit when comparing lengths.

Worked example: 2 units + 3 units = 5 units.

Activity: line up two strips and observe their endpoints.
